Tahiti Bar Stool.

THB-30.

Assembly Manual.

**Important Note: Do Not tighten the bolts until you have all of them in place. Use the Pre-Drilled holes and hand tighten to hold its place.**

1. Unpack THB-30 and check that you received all parts

THB-30 comes with 5 seat components (the Seat and Back come already together), and a package of hardware, including 1 L-Shaped Tightening Tool, 2 Short Screws, and 8 Long Screws.

2. To begin assembly place Side 1 on the ground like the picture above. Take the Leg Supports and match the numbers. Take 2 Long Screws (one for each side) and use the L-Shaped Tool to tighten the screws in the holes by the numbers.

**Note: Be sure to use the Pre-Drilled Holes!**

3. Now that you have both Leg Supports secured to Side 1, place Side 2 on Both Leg supports aligning the Pegs on the Leg Supports with the holes on Side 2. Once the Pegs are in place take 2 more Long Screws and the L-Shaped Tool and tighten them into place.
4. Next, stand the chair on its feet. Take the Seat and Back joint piece and align the pre-drilled holes up. There are Six pre-drilled holes on the Seat and Back piece.  
2 on the top that go down into the top posts of each Side Piece.

Then 2 holes on the back the go through the back of the Side pieces into the Seat piece.  
And finally 2 the go up from the underside of the Side piece into the underside of the Seat piece.

If done correctly you now have a beautiful Tahiti Bar Stool.

Thank you for your business!

**Important Note: Do Not tighten the bolts until you have all of them in place. Use the Pre-Drilled holes and hand tighten to hold its place.**
