Set up manual for Bamboo West Arbor

The content including two side panels, and curved ladder top with 4 support bracers,

1. Lay out all components on the floor, make sure you find the corresponding labels for each component because you need to match them when you put them together.
2. First lay down the two side panels, then put the curved ladder top over them, make sure you match the side panels to the particular end of the ladder top.
3. Attach the side bracers from the panel to the ladder top for security and safety. Use the provided smaller bolts and nuts to attach to the roof and sides. These would match with corresponding labels as well.
4. Then secure the ladder top to the side panels using the bolts and nuts which are provided.
